- 1- In-Depth Water Diversion Treatment by Coupling Preformed Particle Gel and Low Salinity Water flooding in Fractured Carbonate Cores. SPE-198019- MS-SPE .Kuwait Oil & Gas Conference and Show held in Mishref, Kuwait, 13 - 16 October 2019.
- 2- Skin and Reservoir Pressure Profiling Utilizing Production Logging, IOP Conference Series: Materials Science and Engineering 579 (1), 012040-2019
- 3- Evaluation of Formation Capacity and Skin Phenomena of , IOP Conference Series: Materials Science and Engineering, Volume 579, conference 1-2019
- 4- Practical approach for sand-production prediction during production, 53rd US Rock Mechanics/Geomechanics Symposium 2019
- 5- Development of a Semi-Analytical Type Curve of Transient Pressure Response in Complex Well-Reservoir Architectures 2019
- 6- Enhanced Oil Recovery using Smart Water Injection. Journal of Engineering, 2018
- 7- Three Dimensions Geostatistical Model of the Mishrif Carbonate Reservoir - Amara Oil Field, 1 st. IJRTESS 2017
- 8- Reservoir Characterizations and Reservoir Performance of Mishrif Formation in Amara Oil Field, Journal of Engineering, 2017.
- 9- Applied Spatial Data Analysis Technique on Petrophysical Properties of MA Unit of Mishrif Formation/Noor Field. Iraqi Journal of Chemical and Petroleum Engineering, 2016
- 10- Investigation of Factors Influencing Dispersion of Liquid Hydrocarbons in Porous Media, Journal of Engineering-2016
- 11- Undersaturated Oil Compressibility Prediction for Mishrif Reservoir in the Southern Iraqi Oil Fields Using Artificial Neural Network, Journal of Petroleum Research & Studies-2014
- 12- Permeability Prediction in Carbonate Reservoir Using FZI, Iraqi Journal of Chemical and Petroleum Engineering, Vol.14 No.3, Sep.2013
- 13- Using Artificial Neural Network to predict Oil Properties, 2nd. Iraq Oil and Gas Conference 2013.
- 14- "New correlation for predicting undersaturated oil compressibility for Mishrif reservoir in the southern Iraq oil field" Journal of Engineering U.of Baghdad. Volume 19 Nov.9 2013
- 15- A new Correlation for Subcritical Two-Phase Flow of Gas/non-Newton Liquid Through Chokes, Proceeding of the International Conference on Basic Principles and Industrial Applications of Multi-Phase Flow, London, April, 1990.
