## TEMPLATE FOR PROGRAMME SPECIFICATION

## HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

## PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	University of Baghdad / College of Engineering
2. University Department/Centre	Department of Surveying Engineering
3. Programme Title	Cartography I
4. Title of Final Award	BSc. in Surveying Engineering
5. Modes of Attendance offered	Annual
6. Accreditation	
7. Other external influences	
8. Date of production/revision of this specification	Feb.-2021
9. Aims of the Programme	
This course aims to introduce the fundamental concepts of Cartography in addition to the logical steps of map design.	

## 10. Learning Outcomes, Teaching, Learning and Assessment Methods

### A. Cognitive goals

A1. At the end of the course, the students should have a complete knowledge about map design.

A2. A3.

A4. A5.

A6.

### B. The skills goals special to the programme .

B1.

B2. B3.

### Teaching and Learning Methods

1. Lectures

2. Tutorials

3. Practical

4. Homework

### Assessment methods

1. Exams, and Quizzes.

2. Student Engagement through Lectures

3. Projects.

### C. Affective and value goals

## 10. Course Structure

Week	Hours	ILOs	Unit/Module or Topic Title	Teaching Method	Assessment Method
1	2		Cartography (Definition), Map (Definition)		
2	2		Coordinate Systems, Ellipsoidal (Geographic) coordinate system.		
3	2		Cartesian (Geocentric) coordinate system.		
4			Coordinates Transformation		
5	2		Cartographic Projection		
6	2		Scale: Bringing the Earth Down to Size		
7	2		Determining Scale		
8	2		Determining Scale with Lines of Latitude and Longitude.		
9	2		Scale (Type and Design), Choice of Suitable Scale.		
10	2		Changing Scale, Measuring Distance and Area from Maps.		
11	2		Kinds of Maps		
12	2		Grid and Graticule Construction, and Slope		
13	2		Cartographic symbols and color separation.		
14	2		Representation of physical features.		
15	2		Representation of Artificial features.		
16	2		Intervisibility and planning for map coverage.		

17	2		Exam		
18	2		Label Placement		
19	2		Lettering and Numbering.		
20	2		Guidelines for name Placement		
21	2		Basics of symbolization		
22	2		The Nature of Geographic phenomena		
23	2		Execution of Design		
24	2		Execution of Design, Subject Area, Title, Legend, Scale, Orientation, Inset Maps		
25	2		Automation of map compilation.		
26	2		Automation of Image formation.		
27	2		Digital Cartography		
28	2		Vector and raster data		
29	2		Georeferenced process		
30	2		Exam

# TEMPLATE FOR PROGRAMME SPECIFICATION

## HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

### PROGRAMME SPECIFICATION

This program specification provides a concise summary of the main features of the program and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the program.

1. Teaching Institution	College of Engineering
2. University /Department/Centre	Univ. of Baghdad / Department of Surveying
3. Program Title	Geodesy
4. Title of Final Award	BSc in surveying Eng.(4 <sup>th</sup> stage)
5. Modes of Attendance offered	Annual
6. Accreditation	College of Engineering
7. Other external influences	
8. Date of production/revision of this specification	05/02/2021
9. Aims of the Program:	
The Geodesy course aims to introduce the actual shape and size of the earth to enable the survivors to determine the positions with high level of accuracy. The subjects of Geodesy deal with Earth as spheroid and this necessitates introducing the most accurate methods of observations and accurate instruments which can be used effectively to fix the geodetic positions.	

## 10. Learning Outcomes, Teaching, Learning and Assessment Methods

### A. Cognitive goals

- A1. The students will learn and apply the skills of Geodesy to use them in their future specific works.
- A2. The fourth year students should deliver a complete knowledge and practical experience of applying the algorithms of geodesy to introduce geodetic positions, geodetic networks.
- A3. The designed program helps to understand the mathematical relationships between the geodetic positions.
- A4. The graduates will be engaged in the professional practice of surveying with high ethical and professional responsibilities.

### B. The skills goals special to the program.

- B1. A broad education and knowledge for the essential issues that help to understand the impact of Geodesy solutions in a global, societal, and Satellite positioning.
- B2. A practical ability to solve the faced problems by applying fundamental knowledge of computations and suitable techniques, skills, and tools.
- B3. The student should deliver a complete knowledge and practical experience of applying a geometric Geodesy in the theoretical issues of Global positioning.
- B4. An ability to communicate technical material written papers/reports and oral presentations.
- B5. An understanding of the professional, societal, and ethical practice and responsibilities.

### Teaching and Learning Methods

- 1. Lectures.
- 2. Tutorials.
- 3. Homework and Assignments.

### Assessment methods

- Tests and Exams.

### C. Affective and value goals

- C1. An ability to apply knowledge of measurements, computations to derive different positions.
- C2. Dealing with different instruments to measure and calculate the required quantities (i.e. distances and angles)
- C3. Furthermore, the students know how to find mathematical solutions for the first and second geodetic problems (forward and inverse computations).
- C4. An understanding of professional and ethical responsibility.
- C5. An ability to use the techniques, skills, and modern engineering tools that are necessary in Satellite positioning.

### Teaching and Learning Methods

- 1. Lectures.
- 2. Tutorials.
- 3. Homework and Assignments.

### Assessment methods: - Tests and Exams.

D. General and Transferable Skills (other skills relevant to employability and personal development)

D1.

D2. D3.

D4.

Teaching and Learning Methods

Assessment Methods

11. Program Structure

12. Awards and Credits

Level/Year	Course or Module Code	Course or Module Title	Credit rating	Bachelor Degree Requires ( x ) credits
4 <sup>th</sup> Year		Geodesy		Bachelor of Science in Surveying Engineering

### 13. Personal Development Planning

- 1- Attending and holding workshops and seminars to see the latest developments in the field of specialization
- 2- Read the latest research
- 3- Carrying out projects and scientific research
- 4- Read the latest Journals within the specialty

### 14. Admission criteria.

### 15. Key sources of information about the program

Geodesy/ Geometric Geodesy/ Satellite Geodesy

## 10. Course Structure

Week	Hours	ILOs	Unit/Module or Topic Title	Teaching Method	Assessment Method
1.	2h		Introduction and definitions		
2.	2h		The sphere as a reference surface		
3.	2h		Geographical coordinates system		
4.	2h		Transformation between geographical coordinates systems		
5.	2h		The definition of the spheroid reference system		
6.	2h		Relationship between eccentricity and flattening		
7.	2h		Relationship between geodetic		
8.	2h		geocentric and reduce latitude		
9.	2h		Geodetic reference systems of coordinates		
10.	2h		Radii of curvature of spheroid		
11.	2h		Radius of prime vertical		
12.	2h		Radius of oblique normal section		

13.	2h		Area of part of spheroid and total area of spheroid		
14.	2h		Length of loxodrom		
15.	2h		First semester exam		
16.	2h		Reciprocal normal section		
17.	2h		The effect of height of signal due to azimuth		
18.	2h		Reduction of measured quantities in triangulation networks		
19.	2h		Transformation from normal length to geodesic		
20.	2h		Differential equations for geodesic line Direct and inverse geodetic problems 1st principal problem (forward comp.) , Legendre solution (forward comp.)		
21.	2h		Accurate solution using tables (forward comp.)		
22.	2h		Approximate inverse computations		
23.	2h		Accurate inverse computations		

24.	2h		The effect of change of spheroidal parameters due adjusted angles		
25.	2h		Adjustment of geodetic figure (central point figure)		
26.	2h		Astrogeodetic orientation of spheroid		
27.	2h		Physical geodesy and gravimetry , Specifications of equal potential surfaces		
28.	2h		Laplace azimuth , Computing the separation between geoid and spheroid from astro		
29.	2h		Optometric heights , Dynamic heights		
30.	2h		Second semester exam		

11. Infrastructure	
1. Books Required reading:	G. BOMFORD, 1981, Geodesy
	G. Mario A., 2004, Basic of Geomatics, online
2. Main references (sources)	G. BOMFORD, 1981, Geodesy

7. Other external influences	
8. Date of production/revision of this specification	1/2/2021
9. Aims of the Programme	
The course aims to introduce the MATLAB programming language and learn students preparing cods in surveying applications and solving many engineering problems.	

## 10. Learning Outcomes, Teaching, Learning and Assessment Methods

### A. Cognitive goals

- A1. Program graduates will apply communication skills, lifelong learning attitude, and the knowledge of mathematics and basic science to attain advancement within the surveying profession.
- A2. Program graduates will exhibit creativity, leadership and team-building abilities, cultural appreciation and an understanding of global.
- A3. Program graduates will be engaged in the professional practice of engineering with high ethical and professional responsibilities.
- .

### B. The skills goals special to the programme .

- B1. An ability to solve surveying engineering problems using Matlab programming.
- B2. An ability to identify, formulate, and solve mathematics, statistics problems using designed cods.
- B3. An ability to design and conduct experiments and to analyze and interpret data.
- B4. An ability to function within multidisciplinary teams.
- B5. An understanding of professional, ethical practice and responsibilities.

## Teaching and Learning Methods

- 1. Lectures(PDF,PPT and video).
- 2. Tutorials.
- 3. Homework , Assignments and Tests.
- 4. Reports and Exams.

## Assessment methods

- 1.Reports
- 2.Tests
- 3.Exams

C. Affective and value goals

- C1.An ability to apply knowledge of mathematics, science, and engineering
- C2. An ability to design and conduct experiments, as well as to analyze and interpret data.
- C3. An ability to identify, formulate, and solve engineering problems
- C4. An understanding of professional and ethical responsibility
- C5. An ability to communicate effectively
- C6. An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Teaching and Learning Methods

1. Lectures(PDF,PPT and video).
2. Tutorials.
3. Homework and Assignments.
4. Tests and Exams.

Assessment methods

- 1.Reports

## HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	University of Baghdad / College of Engineering
2. University Department/Centre	department of Surveying
3. Programme Title	Photogrammetry I
4. Title of Final Award	BSc in surveying engineering
5. Modes of Attendance offered	Annual
6. Accreditation	
7. Other external influences	
8. Date of production/revision of this specification	1/2/2021
9. Aims of the Programme	
The student should have a complete knowledge and practical experience of applying photogrammetric solution to solve Surveying problems.	

## 10. Learning Outcomes, Teaching, Learning and Assessment Methods

### A. Cognitive goals

A1. Program graduates will apply communication skills, lifelong learning attitude, and the knowledge of mathematics and basic science to attain advancement within the surveying profession.

A2. Program graduates will exhibit creativity, leadership and team-building abilities, cultural appreciation and an understanding of global.

A3. Program graduates will be engaged in the professional practice of engineering with high ethical and professional responsibilities.

.

### B. The skills goals special to the programme .

B1. An ability to solve surveying engineering problems in photogrammetry.

B2. An ability to identify, formulate, and solve mathematics, statistics problems using designed cods.

B3. An ability to design and conduct experiments and to analyze and interpret data.

B4. An ability to function within multidisciplinary teams.

B5. An understanding of professional, ethical practice and responsibilities.

## Teaching and Learning Methods

1. Lectures(PDF,PPT and video).

2. Tutorials.

3. Homework and Assignments.

4. Tests and Exams.

## Assessment methods

1.Reports 2.Tests 3.Exams
C. Affective and value goals C1.An ability to apply knowledge of mathematics, science, and engineering C2. An ability to design and conduct experiments, as well as to analyze and interpret data. C3. An ability to identify, formulate, and solve photogrammetric engineering problems C4. An understanding of professional and ethical responsibility C5. An ability to communicate effectively C6. An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

# TEMPLATE FOR PROGRAMME SPECIFICATION

## HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

### PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	University of Baghdad /College of Engineering
2. University Department/Centre	department of Surveying
3. Programme Title	Matrices
4. Title of Final Award	BSc in surveying engineering
5. Modes of Attendance offered	Annual
6. Accreditation	
7. Other external influences	
8. Date of production/revision of this specification	1/2/2021
9. Aims of the Programme	
The course aims to prepare students to be familiar with the details needed in the subsequent stages in many applications in the specialty classes and so it be as sports, in addition to solving many engineering problems The student should deliver a complete knowledge and to solving many engineering problems	

## 10. Learning Outcomes, Teaching, Learning and Assessment Methods

### A. Cognitive goals

- A1. Program graduates will apply communication skills, lifelong learning attitude, and the knowledge of mathematics and basic science to attain advancement within the surveying profession.
- A2. Program graduates will exhibit creativity, leadership and team-building abilities, cultural appreciation and an understanding of global.
- A3. Program graduates will be engaged in the professional practice of engineering with high ethical and professional responsibilities.

### B. The skills goals special to the programme .

- B1. An ability to solve surveying engineering problems using matrices algebra.
- B2. An ability to identify, formulate, and solve mathematics, statistics problems using designed cods.
- B3. An ability to design and conduct experiments and to analyze and interpret data.
- B4. An ability to function within multidisciplinary teams.
- B5. An understanding of professional, ethical practice and responsibilities.

## Teaching and Learning Methods

- 1. Lectures(PDF,PPT and video).
- 2. Tutorials.
- 3. Homework , Assignments and Tests.
- 4. Reports and Exams.

## Assessment methods

- 1.Reports
- 2.Tests
- 3.Exams

#### C. Affective and value goals

- C1.An ability to apply knowledge of mathematics, science, and engineering
- C2. An ability to design and conduct experiments, as well as to analyze and interpret data.
- C3. An ability to identify, formulate, and solve engineering problems
- C4. An understanding of professional and ethical responsibility

## استمارة وصف البرنامج الأكاديمي للكليات والمعاهد للعام الدراسي ٢٠٢٠-٢٠٢١

الجامعة : بغداد  
الكلية /المعهد : الهندسه  
القسم العلمي : هندسة المساحه  
تاريخ ملء الملف : ٢٠٢١-٢-٦

التوقيع :	التوقيع :
اسم المعاون العلمي :	اسم رئيس القسم :
التاريخ :	التاريخ :

دقق الملف من قبل  
شعبة ضمان الجودة والأداء الجامعي  
اسم مدير شعبة ضمان الجودة والأداء الجامعي:  
/ / التاريخ  
التوقيع

## وصف البرنامج الأكاديمي

يوفر وصف البرنامج الأكاديمي هذا إيجازاً مقتضياً لأهم خصائص البرنامج ومخرجات التعلم المتوقعة من الطالب تحقيقها مبرهنًا عما إذا كان قد حقق الاستفادة القصوى من الفرص المتاحة . ويصاحبه وصف لكل مقرر ضمن البرنامج

١ . المؤسسة التعليمية	جامعه بغداد
٢ . القسم العلمي / المركز	كلية الهندسه- قسم هندسة المساحه
٣ . اسم البرنامج الأكاديمي او المهني	نظام المعلومات الجغرافية
٤ . اسم الشهادة النهائية	بكالوريوس هندسه المساحه
٥ . النظام الدراسي : سنوي /مقررات/اخرى	سنوي
٦ . برنامج الاعتماد المعتمد	المرحلة الرابعه
٧ . المؤثرات الخارجية الأخرى	
٨ . تاريخ إعداد الوصف	٢٠٢٠-٢٠٢١
٩ . أهداف البرنامج الأكاديمي	
تعليم وتدريب الطالب على فهم الاسس النظرية والعملية لعلم نظم المعلومات الجغرافية باعتباره من العلوم الحديثة والمهمه في الوقت الحاضر عموما وخاصة في هندسة المساحه بسبب ارتباطه وتطبيقاته بعده علوم ومنها الجغرافيه والاحصاء والحاسوب	

١٠. مخرجات البرنامج المطلوبة وطرائق التعليم والتعلم والتقييم
<p>أ- الأهداف المعرفية .</p> <p>أ١- التعرف على نظام المعلومات الجغرافية اعتباره نظاما يدخل في معظم التطبيقات الهندسية بكافه اختصاصتها</p> <p>أ٢- أ٣- أ٤- أ٥- أ٦-</p>
<p>ب -الأهداف المهاراتية الخاصة بالبرنامج :</p> <p>ب ١ – يكون للطالب مهاره في استخدام البرنامج الخاص بالنظام والتي سوف يستفاد منها في سوق العمل</p> <p>ب ٢ - ب ٣ -</p>
طرائق التعليم والتعلم
تعليم مدمج ( الكتروني مع حضوري)
طرائق التقييم
الامتحانات والواجبات البيتية والصفية نظريا وعمليا
<p>ج-الأهداف الوجدانية والقيمية :</p> <p>ج١- ج٢- ج٣- ج٤-</p>

# TEMPLATE FOR PROGRAMME SPECIFICATION

## HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

### PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	Engineering College
2. University Department/Centre	University of Baghdad/ Department of Surveying
3. Programme Title	Practical Astronomy
4. Title of Final Award	BSc in Surveying Eng. (3rd Stage)
5. Modes of Attendance offered	Annual
6. Accreditation	
7. Other external influences	
8. Date of production/revision of this specification	2020-2021
9. Aims of the Programme	
The Practical Astronomy course aims to introduce the history of astronomy in engineering measurements, define the motion of heavenly bodies, and time system. The main purpose of this course is how to fix the terrestrial position based on the astronomical observations using different astronomical coordinate systems.	

## 10. Learning Outcomes, Teaching, Learning and Assessment Methods

### A. Cognitive goals

A1. The third year students should deliver a complete knowledge and practical experience (office and field skills) of applying the theories of practical astronomies to introduce the terrestrial positions based joining both of the different time system and the motion of the celestial bodies ( stars, Moon, Sun, satellites, etc.....)

A2. A3.

A4. A5.

A6.

### B. The skills goals special to the programme .

B1.

B2. B3.

### Teaching and Learning Methods

Lectures, tutorials, reports, and field work

### Assessment methods

Exams (more than 1 exam for each semester+ several quizzes), technical reports.

### C. Affective and value goals

C1. C2.

C3. C4.

### Teaching and Learning Methods

1. Lectures.

2. Tutorials.

3. Homework and Assignments.

4. Tests and Exams.

### Assessment methods

Reports.

D. General and Transferable Skills (other skills relevant to employability and personal development)

D1.

D2. D3.

D4.

## HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

### PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	Engineering College
2. University Department/Centre	University of Baghdad / department of Surveying
3. Programme Title	Programming 1
4. Title of Final Award	BSc in Surveying Eng. (4 <sup>th</sup> Stage)
5. Modes of Attendance offered	Annual
6. Accreditation	
7. Other external influences	
8. Date of production/revision of this specification	6/2/2021
9. Aims of the Programme	
The course aims to prepare students to be familiar with the details needed in the subsequent stages in many applications in the specialty classes and so it has as goals in addition to solving many	

## 10. Learning Outcomes, Teaching, Learning and Assessment Methods

A. The student should deliver a complete knowledge and practical experience of applying programming solution to solve problem.

B. The skills goals special to the programme .

B1. The course provide complete knowledge of basic language. Students will be able to develop logics which will help them to create programs, applications in it. Also by learning the basic programming constructs they can easily switch over to any other language in future.

### Teaching and Learning Methods

1. Lectures.
2. Homework and Assignments.
3. Tests and Exams.
4. In-Class Questions and Discussions.

### Assessment methods

Exams (more than 1 exam for each semester+ several quizzes), technical reports.

C. Affective and value goals

C1. Programming / coding surveying engineering problem using q  
basic and visual basic language.

### Teaching and Learning Methods

1. Lectures.
2. Tutorials.
3. Homework and Assignments.
4. Tests and Exams.

Assessment methods

Exams (more than 1 exam for each semester+ several quizzes), technical reports.

D. General and Transferable Skills (other skills relevant to employability and personal development)

D1.

D2. D3.

# TEMPLATE FOR PROGRAMME SPECIFICATION

## HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

### PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	Engineering College
2. University Department/Centre	University of Baghdad / department of Surveying
3. Programme Title	Satellite Geodesy_GNSS
4. Title of Final Award	BSc in Surveying Eng. (4 <sup>th</sup> Stage)
5. Modes of Attendance offered	Annual
6. Accreditation	
7. Other external influences	
8. Date of production/revision of this specification	6/2/2021
9. Aims of the Programme	
This course is prepared for undergraduate students. It starts with general introduction about the development of global surveying techniques and this includes different subjects, such as optical	

## 10. Learning Outcomes, Teaching, Learning and Assessment Methods

C. The fourth year students should deliver a complete knowledge and practical experience of applying the algorithms of space geodesy to introduce geodetic positions and geodetic networks. Furthermore, the students know how to find the optimum procedure for determination of the terrestrial positions in different applications.

D. Lectures, tutorials, and reports regarding to assessment methods.

B. The skills goals special to the programme .

B1. Cognitive: Developing student understanding of GNSS fundamentals and applying these to the design and implementation of a basic GNSS survey.

B2. Behavioral: Train students to set up a basic GNSS base station, selecting the appropriate techniques for a given science question.

B3. Affective: Discuss the application of GNSS at sites with societal impact. Discuss the capability to resolve changes that were previously un measurable.

Teaching and Learning Methods

This module begins with an introductory lecture and discussion on GNSS and a few case studies. The lecture and discussion is supported by a PowerPoint presentation, which introduces the fundamentals of geodesy and GPS/GNSS positioning. The purpose of the lecture is to promote thinking about how and why GPS/GNSS is used

#### Assessment methods

Exams (more than 1 exam for each semester+ several quizzes), technical reports.

#### C. Affective and value goals

C1. explain space geodesy techniques used on Earth ;

## TEMPLATE FOR PROGRAMME SPECIFICATION

### HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

#### PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	Engineering College
2. University Department/Centre	University of Baghdad / department of Surveying
3. Programme Title	Satellite Geodesy_GNSS
4. Title of Final Award	BSc in Surveying Eng. (4 <sup>th</sup> Stage)
5. Modes of Attendance offered	Annual
6. Accreditation	
7. Other external influences	
8. Date of production/revision of this specification	6/2/2021
9. Aims of the Programme	
This course is prepared for undergraduate students. It starts with general introduction about the development of global surveying techniques and this includes different subjects, such as	

## 10. Learning Outcomes, Teaching, Learning and Assessment Methods

### A. Cognitive goals

A1. The fourth year students should deliver a complete knowledge and practical experience of applying the algorithms of space geodesy to introduce geodetic positions and geodetic networks. Furthermore, the students know how to find the optimum procedure for determination of the terrestrial positions in different applications.

A2. Lectures, tutorials, and reports regarding to assessment methods.

### B. The skills goals special to the programme .

#### B. The skills goals special to the programme .

B1. Cognitive: Developing student understanding of GNSS fundamentals and applying these to the design and implementation of a basic GNSS survey.

B2. Behavioral: Train students to set up a basic GNSS base station, selecting the appropriate techniques for a given science question.

B3. Affective: Discuss the application of GNSS at sites with societal impact. Discuss the capability to resolve changes that were previously un measurable.

## Teaching and Learning Methods

1. Lectures.

2. Tutorials.

3. Homework and Assignments.

4. Tests and Exams.

## Assessment methods

Exams (more than 1 exam for each semester+ several quizzes), technical reports.

C. Affective and value goals

C1. explain space geodesy techniques used on Earth ;

C2. define terrestrial and celestial reference systems and passages from one to the other ;

C3. Articulate how GNSS satellites enable the positioning of objects relative to local or global reference frames;

C4. Justify which GNSS tools and techniques are most appropriate for a particular scientific question;

C5. Complete a conceptual diagram of a GNSS system and the related parts;

C6. Recognize and articulate how GNSS-assisted research provides a societal benefit.

Teaching and Learning Methods

1. Lectures.

2. Tutorials.

3. Homework and Assignments.

4. Tests and Exams.

Assessment methods

Exams (more than 1 exam for each semester+ several quizzes), technical reports.

D. General and Transferable Skills (other skills relevant to employability and personal development)

D1.  
D2.  
D3.  
D4.

Teaching and Learning Methods

Assessment Methods

Exams (more than 1 exam for each semester+ several quizzes), technical reports.

11. Programme Structure

Level/Year	Course or Module Code	Course or Module Title	Credit rating	12. Awards and Credits
4th stage/2020-2021		Introduction and definitions		Bachelor Degree Requires ( x ) credits
4th stage/2020-2021		GNSS: Theory and Principles		
4th stage/2020-2021		Development of Global Positioning Techniques		
4th stage/2020-2021		Global Positioning System Basics		
4th stage/2020-2021		Space Segment:		
4th stage/2020-2021		User Segment		

4th stage/2020-2021		GPS satellite signals structure:		
4th stage/2020-2021		Signal Structure:  Signal design, Carrier		

### 13. Personal Development Planning

- 1-Attending and holding workshops and seminars to see the latest developments in the field of specialization
- 2- Read the latest research
- 3- Carrying out projects and scientific research
- 4- Read the latest Journals within the specialty

### 14. Admission criteria .

### 15. Key sources of information about the programme

# TEMPLATE FOR PROGRAMME SPECIFICATION

## HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

### PROGRAMME SPECIFICATION

This program Specification provides a concise summary of the main features of the program and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the program specification.

1. Teaching Institution	Engineering College
2. University Department/Centre	University of Baghdad / department of Surveying
3. Programme Title	Cartography II
4. Title of Final Award	BSc in surveying Eng. (4 <sup>th</sup> stage)
5. Modes of Attendance offered	Annual
6. Accreditation	
7. Other external influences	
8. Date of production/revision of this specification	6/2/2021
9. Aims of the Programme	
Program is designed to training the students on how the earth's surface, anybody and another astronomer representation by coordinates on a plane surface and compute the distortion quotient and direction	

## 10. Learning Outcomes, Teaching, Learning, and Assessment Methods

### A. Cognitive goals

A1. Program graduates will apply communication skills, a lifelong learning attitude, and the knowledge of mathematics and basic science to attain advancement within the surveying profession.

A2. Program graduates will exhibit creativity, leadership and team-building abilities, cultural appreciation, and an understanding of global.

A3. Program graduates will be engaged in the professional practice of surveying engineering with high ethical and professional responsibilities.

A4. The program graduates will strive for professional licensure.

B. The skills goals special to the program.

B1. A broad education and knowledge of contemporary issues necessary to understand the impact of map projection solutions in a global, societal, and environmental context.

B2. An ability to solve the distortion problems in practice by applying fundamental knowledge of mathematics, statistics, science, and by using modern surveying engineering techniques, skills, and tools.

B3. An ability to identify, formulate and solve map projection problems, particularly the planning, design, land use design, boundary determination, mapping, and field layout of infrastructure that meet standards of accuracy and precision, keeping in mind cost, time, safety, and quality needs, and objectives.

B4. An ability to design and conduct experiments and to analyze and interpret data in engineering surveying, topographic surveying, geodetic surveying, and map projection.

B5. An ability to communicate technical material written papers/reports and oral presentations.

B6. An ability to function within multidisciplinary teams.

B7. An understanding of the professional, societal, and ethical practice and responsibilities.

B8. A recognition of the importance of professional licensure and a recognition of the need for, and an ability to engage in, life-long learning.

## Teaching and Learning Methods

### A-Knowledge and Understanding

1. Locate the position
2. Compute the distance
3. Compute direction
4. Compute distortion
5. Questions and Discussions.
6. Connection between Theory and Application.

## Assessment methods

### Reports.

#### C. Affective and value goals

C1. an ability to apply knowledge of mathematics, science, and engineering.

C2. an ability to design and conduct experiments, as well as to analyze and interpret data.

C3. an ability to design a system, component, or process to meet desired needs within realistic constraints.

C4. an ability to function on multi-disciplinary teams.

C5. an ability to identify, formulate, and solve engineering problems.

C6. an understanding of professional and ethical responsibility.

C7. an ability to communicate effectively.

C8. the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.

C9. a recognition of the need for, and an ability to engage in life-long learning

C10. a knowledge of contemporary issues

C11. an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

### Teaching and Learning Methods

1. Lectures.

2. Tutorials.

3. Homework and Assignments.

4. Tests and Exams.

## Assessment methods

### Reports.

D. General and Transferable Skills (other skills relevant to employability and personal development)

D1.  
D2.  
D3.  
D4.

Teaching and Learning Methods

Assessment Methods

11. Programme Structure

Level/Year	Course or Module Code	Course or Module Title	Credit rating	12. Awards and Credits
4 <sup>th</sup> stage/2020-2021		Introduction, Scale.		Bachelor Degree Requires ( x ) credits
		Latitudes and longitudes, Small and Great Circles		
		Distortion:		
		Classification of Projection and their Properties.		
		Construction and Characteristics of Cylindrical Projections.		
		Orthomorphic Mercator's Projection.		
		Conformal Transverse Mercator's Proj.		
		Normal Secant Cylindrical Projections.		
		Exam		
		Conical Projections:(Normal and Tangential).		
		The Conical Projection With Tow Standard Parallels.		
		Conical Equal Area (Bonne's Proj.).		
		The Polyconic Projection.		
		Exam		

		Zenithal Projections.		
		Gnomonic Projections(Polar and Equatorial).		

### 13. Personal Development Planning

# TEMPLATE FOR PROGRAMME SPECIFICATION

## HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

### PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	Engineering College
2. University Department/Centre	University of Baghdad / department of Surveying
3. Programme Title	Engineering Surveying
4. Title of Final Award	BSc in surveying Eng.(3 <sup>rd</sup> stage)
5. Modes of Attendance offered	Annual
6. Accreditation	
7. Other external influences	
8. Date of production/revision of this specification	6/2/2021
9. Aims of the Programme	
The course aims to introduce the Engineering Surveying applications and to give student a practical turning to manage a survey project.	

## 10. Learning Outcomes, Teaching, Learning and Assessment Methods

### A. Cognitive goals

- A1. Program graduates will apply communication skills, lifelong learning attitude, and the knowledge of mathematics and basic science to attain advancement within the surveying profession.
- A2. Program graduates will exhibit creativity, leadership and team-building abilities, cultural appreciation and an understanding of global.
- A3. Program graduates will be engaged in the professional practice of surveying engineering with high ethical and professional responsibilities.
- A4. The program graduates will strive for professional licensure.

### B. The skills goals special to the programme .

- B1. A broad education and knowledge of contemporary issues necessary to understand the impact of surveying engineering solutions in a global, societal, and environmental context.
- B2. An ability to solve surveying engineering problems in practice by applying fundamental knowledge of mathematics, statistics, science, and by using modern surveying engineering techniques, skills, and tools.
- B3. An ability to identify, formulate, and solve surveying engineering problems, particularly the planning, design, establishing horizontal and vertical control, land use design, boundary determination, mapping and field layout of infrastructure that meet standards of accuracy and precision, keeping in mind cost, time, safety and quality needs, and objectives.
- B4. An ability to design and conduct experiments and to analyze and interpret data in engineering surveying, topographic surveying, geodetic surveying, and boundary surveying.
- B5. An ability to communicate technical material written papers/reports and oral presentations.
- B6. An ability to function within multidisciplinary teams.
- B7. An understanding of professional, societal, and ethical practice and responsibilities.
- B8. A recognition of the importance of professional licensure and a recognition of the need for, and an ability to engage in, life-long learning.

C. Affective and value goals

C1. an ability to apply knowledge of mathematics, science, and engineering

C2. an ability to design and conduct experiments, as well as to analyze and interpret data

C3. an ability to design a system, component, or process to meet desired needs within realistic constraints .

C4. an ability to function on multi-disciplinary teams

C5. an ability to identify, formulate, and solve engineering problems

C6. an understanding of professional and ethical responsibility

C7. an ability to communicate effectively

C8. the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context

C9. a recognition of the need for, and an ability to engage in life-long learning

C10. a knowledge of contemporary issues

C11. an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Engineering and Cadastral surveying

## TEMPLATE FOR PROGRAMME SPECIFICATION

### HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

#### PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	Engineering College
2. University Department/Centre	University of Baghdad / department of Surveying
3. Programme Title	Photogrammetry II
4. Title of Final Award	BSc in surveying Eng.(3 <sup>rd</sup> stage)
5. Modes of Attendance offered	Annual
6. Accreditation	
7. Other external influences	
8. Date of production/revision of this specification	6/2/2021
9. Aims of the Programme	
The course aims to introduce the Engineering Surveying applications and to give student a practical turning to manage a survey project.	

## 10. Learning Outcomes, Teaching, Learning and Assessment Methods

### A. Cognitive goals

- A1. Program graduates will apply communication skills, lifelong learning attitude, and the knowledge of mathematics and basic science to attain advancement within the surveying profession.
- A2. Program graduates will exhibit creativity, leadership and team-building abilities, cultural appreciation and an understanding of global.
- A3. Program graduates will be engaged in the professional practice of surveying engineering with high ethical and professional responsibilities.
- A4. The program graduates will strive for professional licensure.

### B. The skills goals special to the programme .

- B1. A broad education and knowledge of contemporary issues necessary to understand the impact of surveying engineering solutions in a global, societal, and environmental context.
- B2. An ability to solve surveying engineering problems in practice by applying fundamental knowledge of mathematics, statistics, science, and by using modern surveying engineering techniques, skills, and tools.
- B3. An ability to identify, formulate, and solve surveying engineering problems, particularly the planning, design, establishing horizontal and vertical control, land use design, boundary determination, mapping and field layout of infrastructure that meet standards of accuracy and precision, keeping in mind cost, time, safety and quality needs, and objectives.
- B4. An ability to communicate technical material written papers/reports and oral presentations.
- B5. An ability to function within multidisciplinary teams.
- B6. An understanding of professional, societal, and ethical practice and responsibilities.
- B7. A recognition of the importance of professional licensure and a recognition of the need for, and an ability to engage in, life-long learning.

#### COURSE SPECIFICATION

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

<b><u>1. Teaching Institution</u></b>	University of Baghdad Engineering College
<b><u>2. University Department/Centre</u></b>	Department of Surveying Eng.
<b><u>3. Course title/code&amp; Description</u></b>	Mechanical Eng.
<b><u>4. Programme(s) to which it Contributes</u></b>	BSc in Surveying Eng.(1 <sup>st</sup> Stage)
<b><u>5. Modes of Attendance offered</u></b>	Annual System ; There is only one mode of delivery, which is a “Day Program”. The students are full time students, and on campus. They attend full day program in face-to-face mode. The academic year is composed of 30-week regular subjects.

	Each graduating student has to successfully There is <i>no</i> on-line subject which may be used as supplementary material for the classroom instruction.
<b><u>6. Semester/Year</u></b>	2020-2021
<b><u>7. Number of hours tuition (total)</u></b>	120 hrs. /4 hrs. per week
<b><u>8. Date of production/revision of this specification</u></b>	May– 30 / 2021
<b><u>9. Aims of the Course</u></b>	
1.Introduce basic definitions and introductory concepts of Mechanical Eng.	

### **10·Learning Outcomes**

### **11.Teaching and Learning Methods**

1. Lectures.
2. Tutorials.
3. Homework and Assignments.
4. Tests and Exams.
5. In-Class Questions and Discussions.

### **12. Assessment Methods**

1. Examinations, Tests, and Quizzes.
2. Extracurricular Activities.
3. Student Engagement during Lectures.

### **13. Grading Policy**

1. Quizzes:
  - There will be a ( 20 – 25 ) closed books and notes quizzes during the academic

year.

The quizzes will count 20% of the total course grade

## 14. Course Structure

Week					
1			Introduction to vector algebra		
٢			Forces:- types, force resolution , force composition		
٣			Moment of a force , couples		
٤			Resultant of forces , coplaner systems		
٥			Varginons principle , Resultant of non- coplaner systems		
٦			Monthly exam1 , equilibrium , free body diagram		
٧			Varginons principle , Resultant of non- coplaner systems		
٨			Reactions of simple structures

## HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

### PROGRAMME SPECIFICATION

This program Specification provides a concise summary of the main features of the program and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the program specification.

1. Teaching Institution	Engineering College
2. University Department/Centre	University of Baghdad / department of Surveying
3. Programme Title	Cartography II
4. Title of Final Award	BSc in surveying Eng. (4 <sup>th</sup> stage)
5. Modes of Attendance offered	Annual
6. Accreditation	
7. Other external influences	
8. Date of production/revision of this specification	6/2/2021
9. Aims of the Programme	
Program is designed to training the students on how the earth's surface, anybody and another astronomer representation by coordinates on a plane surface and compute the distortion quotient and direction	

## 10. Learning Outcomes, Teaching, Learning, and Assessment Methods

### A. Cognitive goals

A1. Program graduates will apply communication skills, a lifelong learning attitude, and the knowledge of mathematics and basic science to attain advancement within the surveying profession.

A2. Program graduates will exhibit creativity, leadership and team-building abilities, cultural appreciation, and an understanding of global.

A3. Program graduates will be engaged in the professional practice of surveying engineering with high ethical and professional responsibilities.

A4. The program graduates will strive for professional licensure.

B. The skills goals special to the program.

B1. A broad education and knowledge of contemporary issues necessary to understand the impact of map projection solutions in a global, societal, and environmental context.

B2. An ability to solve the distortion problems in practice by applying fundamental knowledge of mathematics, statistics, science, and by using modern surveying engineering techniques, skills, and tools.

B3. An ability to identify, formulate and solve map projection problems, particularly the planning, design, land use design, boundary determination, mapping, and field layout of infrastructure that meet standards of accuracy and precision, keeping in mind cost, time, safety, and quality needs, and objectives.

B4. An ability to design and conduct experiments and to analyze and interpret data in engineering surveying, topographic surveying, geodetic surveying, and map projection.

B5. An ability to communicate technical material written papers/reports and oral presentations.

B6. An ability to function within multidisciplinary teams.

B7. An understanding of the professional, societal, and ethical practice and responsibilities.

B8. A recognition of the importance of professional licensure and a recognition of the need for, and an ability to engage in, life-long learning.

## Teaching and Learning Methods

### A-Knowledge and Understanding

1. Locate the position
2. Compute the distance
3. Compute direction
4. Compute distortion
5. Questions and Discussions.
6. Connection between Theory and Application.

## Assessment methods

### Reports.

#### C. Affective and value goals

C1. an ability to apply knowledge of mathematics, science, and engineering.

C2. an ability to design and conduct experiments, as well as to analyze and interpret data.

C3. an ability to design a system, component, or process to meet desired needs within realistic constraints.

C4. an ability to function on multi-disciplinary teams.

C5. an ability to identify, formulate, and solve engineering problems.

C6. an understanding of professional and ethical responsibility.

C7. an ability to communicate effectively.

C8. the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.

C9. a recognition of the need for, and an ability to engage in life-long learning

C10. a knowledge of contemporary issues

C11. an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

### Teaching and Learning Methods

1. Lectures.

2. Tutorials.

3. Homework and Assignments.

4. Tests and Exams.

## Assessment methods

### Reports.

D. General and Transferable Skills (other skills relevant to employability and personal development)

D1.  
D2.  
D3.  
D4.

Teaching and Learning Methods

Assessment Methods

## 11. Programme Structure

Level/Year	Course or Module Code	Course or Module Title	Credit rating	12. Awards and Credits
4 <sup>th</sup> stage/2020-2021		Introduction, Scale.		Bachelor Degree Requires ( x ) credits
		Latitudes and longitudes, Small and Great Circles		
		Distortion:		
		Classification of Projection and their Properties.		
		Construction and Characteristics of Cylindrical Projections.		
		Orthomorphic Mercator's Projection.		
		Conformal Transverse Mercator's Proj.		
		Normal Secant Cylindrical Projections.		
		exam		
		Conical Projections:(Normal and Tangential).		
		The Conical Projection With Tow Standard Parallels.		
		Conical Equal Area (Bonne's Proj.).		
		The Polyconic Projection.		
		Exam		

		Zenithal Projections.		
		Gnomonic Projections(Polar and Equatorial).		

### 13. Personal Development Planning

- 8- Attending and holding workshops and seminars to see the latest developments in the field of specialization
- 2- Read the latest research
- 3- Carrying out projects and scientific research
- 4- Read the latest Journals within the specialty

### 14. Admission criteria.

### 15. Key sources of information about the programme

Map projection.

## TEMPLATE FOR PROGRAMME SPECIFICATION

### HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

#### PROGRAMME SPECIFICATION

This program Specification provides a concise summary of the main features of the program and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the program specification.

1. Teaching Institution	Engineering College
2. University Department/Centre	University of Baghdad / department of Surveying
3. Programme Title	Cadastral Surveying
4. Title of Final Award	BSc in surveying Eng. (3 <sup>rd</sup> stage)
5. Modes of Attendance offered	Annual
6. Accreditation	
7. Other external influences	
8. Date of production/revision of this specification	6/2/2021
9. Aims of the Programme	
Training the student to represent the coordinates of the points on the ground and the relationships between the points and to find the unknown coordinates of multiple aspects, and then divide the lands	

## 10. Learning Outcomes, Teaching, Learning, and Assessment Methods

### A. Cognitive goals

A1. Program graduates will apply communication skills, a lifelong learning attitude, and the knowledge of mathematics and basic science to attain advancement within the surveying profession.

A2. Program graduates will exhibit creativity, leadership and team-building abilities, cultural appreciation, and an understanding of global.

A3. Program graduates will be engaged in the professional practice of surveying engineering with high ethical and professional responsibilities.

A4. The program graduates will strive for professional licensure.

### B. The skills goals special to the program.

B1. A broad education and knowledge of contemporary issues necessary to understand the impact of surveying engineering solutions in a global, societal, and environmental context.

B2. An ability to solve surveying engineering problems in practice by applying fundamental knowledge of mathematics, statistics, science, and by using modern surveying engineering techniques, skills, and tools.

B3. An ability to identify, formulate and solve surveying engineering problems, particularly the planning, design, establishing horizontal and vertical control, land use design, boundary determination, mapping, and field layout of infrastructure that meet standards of accuracy and precision, keeping in mind cost, time, safety and quality needs, and objectives.

B4. An ability to communicate technical material written papers/reports and oral presentations.

B5. An ability to function within multidisciplinary teams.

B6. An understanding of the professional, societal, and ethical practice and responsibilities.

B7. A recognition of the importance of professional licensure and a recognition of the need for, and an ability to engage in, life-long learning.

## Teaching and Learning Methods

Level/Year	Course or Module Code	Course or Module Title	Credit rating	12. Awards and Credits
3 <sup>rd</sup> stage/2020-2021		Introduction, basics, and historical overview		Bachelor Degree Requires ( x ) credits
		Low effort method for modifying the Travers and its application		
		Add angles and directions		
		Forward computation		
		Inverse computation		
		The intersection of straight lines		
		The intersection of a straight line with the circle		
		Intersection of curves		
		Applications of different intersections		
		Calculate missing elements in locked travers		
		Missing element apps		
		Area calculations by various methods		
		Land division		

	Land segmentation applications		
	Specification for designing divisions in the city		
	Calculation of pre-designed housing units		
	Calculation of housing units on non-windowed streets		
	Designing residential divisions in the city		
	Cadastral divisions of the vast lands and projects		
	Development of divisions to the unified cadastral system		
	Engineering project		

### 13. Personal Development Planning

# 11. Programme Structure

Level/Year	Course or Module Code	Course or Module Title	Credit rating	12. Awards and Credits
2 <sup>nd</sup> stage/2020-2021		General introduction - basic definitions in descriptive geometry and related topics, levels and axes of projection.		Bachelor Degree Requires ( x ) credits
		Projection types: central, oblique, vertical, digital, stereoscopic		
		Representation of a point with positive and negative coordinates		
		Representation of the straight line with its different directions		
		Representing the plane with its projections and its effects		
		exam		
		Secondary auxiliary levels		
		Geometric lines, planes, and surfaces - some objects and crystals		
		A general study of geometric objects, , finding the shape of the resulting sectors, finding straight points of intersection for them and calculating their volumes and surface areas		

		The cube, rectangular prism, and parallelepiped		
		Opening the geometric figure		
		Exam

## وصف البرنامج الأكاديمي

يوفر وصف البرنامج الأكاديمي هذا إيجازاً مقتضياً لأهم خصائص البرنامج ومخرجات التعلم المتوقعة من الطالب تحقيقها مبرهنًا عما إذا كان قد حقق الاستفادة القصوى من الفرص المتاحة . ويصاحبه وصف لكل مقرر ضمن البرنامج

١٥ . المؤسسة التعليمية	جامعة بغداد
١٦ . القسم العلمي / المركز	كلية الهندسة قسم هندسة المساحة
١٧ . اسم البرنامج الأكاديمي او المهني	المساحة II
١٨ . اسم الشهادة النهائية	بكالوريوس
١٩ . النظام الدراسي : سنوي /مقررات/اخرى	سنوي
٢٠ . برنامج الاعتماد المعتمد	
٢١ . المؤثرات الخارجية الأخرى	
٢٢ . تاريخ إعداد الوصف	2021/2/2
٢٣ . أهداف البرنامج الأكاديمي	
يمكن للخريجين ان يمارسون العمل في المجال الهندسي من خلال عمليات المسح الحقلية و التحقق من الارصادات	
ان علم المساحة و نظرية الاخطاء من العلوم الاساسية في اختصاص هندسة المساحة ، اي مشروع هندسي يجب ان يمتلك دقة معلومة و ثقة في القياسات لذلك يهدف هذا المقرر الى توضيح هذه المواضيع بصورة مفصلة.	
٢٤ . مخرجات البرنامج المطلوبة وطرائق التعليم والتعلم والتقييم	
٢٥ . بنية البرنامج	

المرحلة الدراسية		رمز المقرر أو المساق	اسم المقرر أو المساق	الساعات المعتمدة
				نظري
				عملي
المرحلة الثانية			المساحة II	٦٠ نظري + ٩٠ عملي

٢٦. التخطيط للتطور الشخصي
<p>الدورات</p> <p>ورش العمل</p> <p>اعداد برامج</p> <p>المشاركة في المؤتمرات</p> <p>التواصل مع بقية الجامعات</p> <p>نشر البحوث</p>
٢٧. معيار القبول (وضع الأنظمة المتعلقة بالالتحاق بالكلية أو المعهد)
<p>الحصول على شهادة الاعدادية</p> <p>الاولا من خريجي معاهد المساحة</p>
٢٨. أهم مصادر المعلومات عن البرنامج

الكتب المنهجية الخاصة بالمادة

المصادر الخارجية

الكتب و المصادر الالكترونية

التوقيع

مصادقة السيد العميد

## وصف البرنامج الأكاديمي

يوفر وصف البرنامج الأكاديمي هذا إيجازاً مقتضياً لأهم خصائص البرنامج ومخرجات التعلم المتوقعة من الطالب تحقيقها مبرهنناً عما إذا كان قد حقق الاستفادة القصوى من الفرص المتاحة . ويصاحبه وصف لكل مقرر ضمن البرنامج

٢٩ . المؤسسة التعليمية	جامعة بغداد
٣٠ . القسم العلمي / المركز	كلية الهندسة قسم هندسة المساحة
٣١ . اسم البرنامج الأكاديمي او المهني	تصحيح القياسات
٣٢ . اسم الشهادة النهائية	بكالوريوس
٣٣ . النظام الدراسي : سنوي /مقررات/اخرى	سنوي
٣٤ . برنامج الاعتماد المعتمد	
٣٥ . المؤثرات الخارجية الأخرى	
٣٦ . تاريخ إعداد الوصف	2021/2/2
٣٧ . أهداف البرنامج الأكاديمي	
يمكن للخريجين ان يمارسون العمل في المجال الهندسي من خلال عمليات تصحيح القياسات الحقلية و التحقق من الارصادات	
ان علم تصحيح القياسات و نظرية الاخطاء من العلوم الاساسية في اختصاص هندسة المساحة ، اي مشروع هندسي يجب ان يمتلك دقة معلومة و ثقة في القياسات لذلك يهدف هذا المقرر الى توضيح هذه المواضيع بصورة مفصلة.	
٣٨ . مخرجات البرنامج المطلوبة وطرائق التعليم والتعلم والتقييم	
٣٩ . بنية البرنامج	

المرحلة الدراسية	رمز المقرر أو المساق	اسم المقرر أو المساق	الساعات المعتمدة
			نظري
			عملي
المرحلة الثالثة		تصحيح القياسات	٦٠ ساعة و ٩٠ ساعة عملي

٤٠. التخطيط للتطور الشخصي
الدورات ورش العمل اعداد برامج المشاركة في المؤتمرات التواصل مع بقية الجامعات نشر البحوث
٤١. معيار القبول (وضع الأنظمة المتعلقة بالالتحاق بالكلية أو المعهد)
حصول على شهادة الاعدادية الاولى من خريجي المعاهد
٤٢. أهم مصادر المعلومات عن البرنامج

الكتب المنهجية الخاصة بالمادة

المصادر الخارجية

الكتب و المصادر الالكترونية

مخطط مهارات المنهج

يرجى وضع إشارة في المربعات المقابلة لمخرجات التعلم الفردية من البرنامج الخاضعة للتقييم

مخرجات التعلم المطلوبة من البرنامج

المهارات العامة والتأهيلية المنقولة (المهارات الأخرى المتعلقة بقابلية التوظيف والتطور الشخصي)				الاهداف الوجدانية والقيمية				الاهداف المهاراتية الخاصة بالبرنامج				الاهداف المعرفية				أساسي أم اختياري	اسم المقرر	رمز المقرر	السنة / المستوى
د	د	د	د	ج	ج	ج	ج	ب	ب	ب	ب	أ	أ	أ	أ				
																اساسي	تصحيح القياسات		الثالثة

## نموذج وصف المقرر

### وصف المقرر

يوفر وصف المقرر هذا إيجازاً مقتضياً لأهم خصائص المقرر ومخرجات التعلم المتوقعة من الطالب تحقيقها مبرهنناً عما إذا كان قد حقق الاستفادة القصوى من فرص التعلم المتاحة. ولا بد من الربط بينها وبين وصف البرنامج.

٢٥ . المؤسسة التعليمية	جامعة بغداد
٢٦ . القسم العلمي / المركز	كلية الهندسة- قسم هندسة المساحة
٢٧ . اسم / رمز المقرر	
٢٨ . أشكال الحضور المتاحة	الإلكتروني و تواجد فعلي في العملي
٢٩ . الفصل / السنة	سنوي
٣٠ . عدد الساعات الدراسية (الكلي)	٦٠ ساعة نظري و كذلك عملي
٣١ . تاريخ إعداد هذا الوصف	2021/2/2
٣٢ . أهداف المقرر	
يمكن للخريجين ان يمارسون العمل في المجال الهندسي من خلال عمليات تصحيح القياسات الحقلية و التحقق من الارصادات	
ان علم تصحيح القياسات و نظرية الاخطاء من العلوم الاساسية في اختصاص هندسة المساحة ، اي مشروع هندسي يجب ان يمتلك دقة معلومة و ثقة في القياسات لذلك يهدف هذا المقرر الى توضيح هذه المواضيع بصورة مفصلة.	

٣٣ . مخرجات المقرر وطرائق التعليم والتعلم والتقييم

<p>أ- الاهداف المعرفية</p> <p><b><i>The student should deliver a complete knowledge and practical experience of applying least squares adjustment solution to solve surveying problems and have a principal knowledge about least squares adjustment</i></b></p>	<p>طرائق التقييم</p> <p>عن الطريق الواجبات اليومية الامتحانات اليومية الامتحانات الفصلية تقديم التقارير الحضور</p>
<p>طرائق التعليم والتعلم</p> <p>المحاضرات pdf&amp;ppt المحاضرات الفديوية التقارير التطبيقات العملية</p>	<p>طرائق التقييم</p> <p>عن الطريق الواجبات اليومية الامتحانات اليومية الامتحانات الفصلية تقديم التقارير الحضور</p>
<p>د - المهارات العامة والتأهيلية المنقولة ( المهارات الأخرى المتعلقة بقابلية التوظيف والتطور الشخصي ).</p> <p>د ١ - الدورات التأهيلية د ٢ - الندوات د ٣ - ورش العمل د ٤ - التواصل مع بقية الجامعات</p>	

الأسبوع	الساعات	مخرجات التعلم المطلوبة	اسم الوحدة / أو الموضوع	طريقة التعليم	طريقة التقييم
١	٢		مقدمة احصائية + تعريف المصطلحات و المصادر	Ppt &pdf+ video	حضور ومشاركة CW
٢	٢		انواع الاخطاء ( الدقة + الاتقان +الخطأ النسبي)	Ppt &pdf+ video	حضور ومشاركة CW
٣	٢		مقاييس الدقة + الاحتمالية الاحصائية	Ppt &pdf+ video	حضور ومشاركة CW
٤	٢		رسم منحنى التوزيع الطبيعي و الاخطاء الاحتمالية	Ppt &pdf+ video	حضور ومشاركة CW
٥	٢		الاشتقاق الرياضي الاقل المربعات + الارصادات الموزونة	Ppt &pdf+ video	حضور ومشاركة CW
٦	٢		مقدمة عن انتشار الاخطاء العشوائية	Ppt &pdf+ video	حضور ومشاركة CW
٧	٢		استخدام المصفوفات في حساب انتشار الاخطاء العشوائية	Ppt &pdf+ video	حضور ومشاركة CW
٨	٢		دقة الاجهزة في قياس المسافات الالكترونية	Ppt &pdf+ video	حضور ومشاركة CW
٩	٢		التحليل المسبق للبيانات	Ppt &pdf+ video	حضور ومشاركة CW
١٠	٢		اسلوب التصحيح باقل المربعات	Ppt &pdf+ video	حضور ومشاركة CW
١١	٢		اشتقاق المعادلات الارصادية وتطبيقاتها	Ppt &pdf+ video	حضور ومشاركة CW
١٢	٢		اشتقاق المعادلات الشرطية وتطبيقاتها	Ppt &pdf+ video	حضور ومشاركة CW
١٣	٢		حساب دقة البيانات بعد	Ppt &pdf+	حضور

ومشاركة CW	video	تاتصحيح ومقارنتها بين طرق التصحيح			
		امتحان الفصل الاول		٢	١٤
حضور ومشاركة CW	Ppt &pdf+ video	مقدمة عن مصفوفة التباين والتغاير وتطبيقاتها		٢	١٥
حضور ومشاركة CW	Ppt &pdf+ video	منحني القطع الناقص للخطاء+ والنسبي		٢	١٦
حضور ومشاركة CW	Ppt &pdf+ video	عطلة نصف السنة		٢	١٧
حضور ومشاركة CW	Ppt &pdf+ video	معايير الدقة في اعمال المسح		٢	١٨
حضور ومشاركة CW	Ppt &pdf+ video	تطبيقات التصحيح بالمعادلات الشرطية		٢	19
حضور ومشاركة CW	Ppt &pdf+ video	مقدمة عن تصحيح شبكات التسوية بالمعادلات الشرطية		٢	20
حضور ومشاركة CW	Ppt &pdf+ video	تصحيح بشبكات التضليع بالمعادلات الشرطية		٢	21
حضور ومشاركة CW	Ppt &pdf+ video	تطبيقات في تصحيح شبكات التثليث الزاوي		٢	22
حضور ومشاركة CW	Ppt &pdf+ video	استخدام الاتجاهات بدلا من الزوايا		٢	23
حضور ومشاركة CW	Ppt &pdf+ video	تصحيح شبكات التثليث بالاطوال		٢	24
		امتحان الفصل الثاني		٢	25
حضور ومشاركة CW	Ppt &pdf+ video	شبكات التسوية وتطبيقاتها الحقلية		٢	26
حضور ومشاركة CW	Ppt &pdf+ video	شبكات التضليع بطريقة المعادلات الرصدية		٢	27
حضور	Ppt &pdf+	التصحيح بطريقة تباين		٢	28

ومشاركة cw	video	الاحداثيات			
حضور ومشاركة cw	Ppt &pdf+ video	النقاط الامامي بالاطوال و التقاطع العكسي		٢	29
حضور ومشاركة cw	Ppt &pdf+ video	التقاطع الامامي بالاتجاهات و التقاطع العكسي		٢	30

٣٥. البنية التحتية	
كتاب تصحيحات القياسات في المساحة الهندسية و المساحة المستوية	٥- الكتب المقررة المطلوبة
Adjustment computations Practical least square Observation and least square	٦- المراجع الرئيسية (المصادر)
Adjustment computations Practical least square	ج) الكتب والمراجع التي يوصى بها (المجلات العلمية، التقارير، .....)
Observation and least square	ح) المراجع الالكترونية، مواقع الانترنت .....،

٣٦. خطة تطوير المقرر الدراسي
اضافة بعض البرمجيات الحديثة الى المقرر

وزارة التعليم العالي والبحث العلمي  
جهاز الإشراف والتقويم العلمي  
دائرة ضمان الجودة والاعتماد الأكاديمي

## نموذج وصف المقرر

### وصف المقرر

يوفر وصف المقرر هذا إيجازاً مقتضياً لأهم خصائص المقرر ومخرجات التعلم المتوقعة من الطالب تحقيقها مبرهنماً عما إذا كان قد حقق الاستفادة القصوى من فرص التعلم المتاحة. ولا بد من الربط بينها وبين وصف البرنامج.

٣٧. المؤسسة التعليمية	جامعة بغداد
٣٨. القسم العلمي / المركز	كلية الهندسة- قسم هندسة المساحة
٣٩. اسم / رمز المقرر	
٤٠. أشكال الحضور المتاحة	الإلكتروني و تواجد فعلي في العملي
٤١. الفصل / السنة	سنوي
٤٢. عدد الساعات الدراسية (الكلي)	٦٠ ساعة نظري و ٩٠ عملي
٤٣. تاريخ إعداد هذا الوصف	2021/2/2
٤٤. أهداف المقرر	
يمكن للخريجين ان يمارسون العمل في المجال الهندسي من خلال عمليات المسح الحقلية و التحقق من الارصادات	
ان علم المساحة و نظرية الاخطاء من العلوم الاساسية في اختصاص هندسة المساحة ، اي مشروع هندسي يجب ان يمتلك دقة معلومة و ثقة في القياسات لذلك يهدف هذا المقرر الى توضيح هذه المواضيع بصورة مفصلة.	

٤٥. مخرجات المقرر وطرائق التعليم والتعلم والتقييم

<p>أ- الاهداف المعرفية</p> <p>تدريب الطالب على المسح الارضي من خلال عمليات رفع النقاط او تسقيط النقاط على الارض من خلال حساب الاحداثيات الحقيقية للأبنية و الطرق والجسور وغيرها من العوارض تمثيل حقيقي و حساب العلاقات بين النقاط وايجاد الاحداثيات المجهولة بطرق متعددة وتصميم الشبكات الجيوديسية بدقة عالية .</p>	
<p>طرائق التقييم</p> <p>عن الطريق الواجبات اليومية الامتحانات اليومية الامتحانات الفصلية تقديم التقارير الحضور</p>	
<p>طرائق التعليم والتعلم</p> <p>المحاضرات pdf&amp;ppt المحاضرات الفديوية التقارير التطبيقات العملية</p>	
<p>طرائق التقييم</p>	
<p>عن الطريق الواجبات اليومية الامتحانات اليومية الامتحانات الفصلية تقديم التقارير الحضور</p>	
<p>د - المهارات العامة والتأهيلية المنقولة ( المهارات الأخرى المتعلقة بقابلية التوظيف والتطور الشخصي ).</p> <p>د ١ - الدورات التأهيلية د ٢ - الندوات د ٣ - ورش العمل د ٤ - التواصل مع بقية الجامعات</p>	

الأسبوع	الساعات	مخرجات التعلم المطلوبة	اسم الوحدة / أو الموضوع	طريقة التعليم	طريقة التقييم
١	٢		مقدمة عن المسح المتقدم (القياسات الدقيقة و الاجهزة)	Ppt &pdf+ video	حضور ومشاركة CW
٢	٢		المعلومات الاساسية عن المسح المتقدم وادارة وتنظيم الاعمال	Ppt &pdf+ video	حضور ومشاركة CW
٣	٢		شبكات التثليث والغرض من التثليث	Ppt &pdf+ video	حضور ومشاركة CW
٤	٢		الكشف عن الاخطاء باستخدام الاحصاء	Ppt &pdf+ video	حضور ومشاركة CW
٥	٢		درجات التثليث	Ppt &pdf+ video	حضور ومشاركة CW
٦	٢		الاشكال الهندسية المستخدمة في التثليث	Ppt &pdf+ video	حضور ومشاركة CW
٧	٢		حساب قوة الاشكال	Ppt &pdf+ video	حضور ومشاركة CW
٨	٢		التثبيت نقاط السيطرة واستخدام الابراج	Ppt &pdf+ video	حضور ومشاركة CW
٩	٢		المقترح الاول في بناء الشبكات	Ppt &pdf+ video	حضور ومشاركة CW
١٠	٢		تحديد خط القاعدة	Ppt &pdf+ video	حضور ومشاركة CW
١١	٢		تصحيح خط القاعدة	Ppt &pdf+ video	حضور ومشاركة CW
١٢	٢		القياس الدقيق للزوايا	Ppt &pdf+ video	حضور ومشاركة CW
١٣	٢		التصحيح الزوايا بطريقة السيات	Ppt &pdf+ video	حضور ومشاركة CW

		القياس بطريقة شرايبر		٢	١٤
حضور ومشاركة CW	Ppt &pdf+ video	التصحيح بطريقة شرايبر		٢	١٥
حضور ومشاركة CW	Ppt &pdf+ video	امتحان الفصل الاول		٢	١٦
حضور ومشاركة CW	Ppt &pdf+ video	عطلة نصف السنة		٢	١٧
حضور ومشاركة CW	Ppt &pdf+ video	طريقة الخروج عن المركز		٢	١٨
حضور ومشاركة CW	Ppt &pdf+ video	التقاطع الامامي بالزوايا		٢	19
حضور ومشاركة CW	Ppt &pdf+ video	التقاطع الخلفي بالزوايا		٢	20
حضور ومشاركة CW	Ppt &pdf+ video	تصحيح مواقع النقاط المقاسة		٢	21
حضور ومشاركة CW	Ppt &pdf+ video	تصحيح الشكل الرباعي المتقاطع الاقطار		٢	22
حضور ومشاركة CW	Ppt &pdf+ video	تصحيح الشكل ذو النقطة المركزية		٢	23
حضور ومشاركة CW	Ppt &pdf+ video	مقدمة عن الجايروثيودولايت		٢	24
		طريقة القياس بالجايروثيودولايت		٢	25
حضور ومشاركة CW	Ppt &pdf+ video	شبكات التثليث البعدي		٢	26
حضور ومشاركة CW	Ppt &pdf+ video	استخدامات الاجهزة الاكترونية		٢	27
حضور ومشاركة CW	Ppt &pdf+ video	موازنة الشبكات وطرق التثليث		٢	28
حضور	Ppt &pdf+	امتحان الفصل الثاني		٢	29

ومشاركة CW	video				
حضور ومشاركة CW	Ppt &pdf+ video	التقاطع بالطوال وتصحيح المواقع		٢	30

#### ٤٧. البنية التحتية

كتاب المساحة الهندسية و المساحة المستوية Engineering surveying	٧- الكتب المقررة المطلوبة
Adjustment computations Plane surveying Surveying .7th Practical least square Observation and least square	٨- المراجع الرئيسية (المصادر)
Practical least square	خ) الكتب والمراجع التي يوصى بها (المجلات العلمية، التقارير، .....)
Project surveying Observation and least square	د) المراجع الالكترونية، مواقع الانترنت .....،

#### ٤٨. خطة تطوير المقرر الدراسي

اضافة بعض البرمجيات الحديثة الى المقرر تطوير الجانب العملي من خلال استخدام الاجهزة الحديثة
