

المشروع	اسم المشرف	ت
1- Cloud Computing: Features and Challenges	أ.د. سليم محمد رضا	1
2- Automated Tracking Car	أ.د. طارق زياد	2
3- Automated Tracking Airplane		
4- Power Plant Steam Turbine Controller Design and Simulation	أ.م. د. فراس محمد	3
5- Satellite Attitude Control Using Modern Control Techniques	أ.م.د. ابراهيم قاسم	4
6- Design and Implementation of Internet Protocols.	أ.م.د. زينب توفيق	5
7- Building Wireless Alarm Control System	أ.م. د. منى هادي	6
8- Design of Fire Alarm System for a Given Building	أ.م.د. نزار هادي	7
9- Wireless Home Automation System Based Android Platform	أ.م.د. ضياء جاسم	8
10-Noise Reduction in Low Noise Amplifier at 2.4 GHz	أ.م.د. محمد ناظم	9
11-Multi Probe Temperature and Humidity Meter for PV Panel	م.د. فاضل عباس	10
12-Design an Intelligent Light Control System	م.د. حنان ميخائيل	11
13-Design and Implementation of Patch Antenna for Wi-Fi Transceiver	م.د. مرتضى جواد	12
14-Fast Analytical Techniques for DC-DC Converter Dynamics	م.د. باسم محمد	13
15-Design and Implementation of Class D Power Amplifier	م.د. اسماعيل شنان	14
16-S/W & H/W Design of Parallel Processing Systems and Parallel Algorithm Techniques	م.د. أسماء حميد	15
17-Design and Optimization of CMOS Operational Amplifier	م.د. علي طويج	16
18-Smart Application Using Dual Embedded Architectures	م. تغريد محمد علي	17
19-Protection of The Baggage Using Security Alarm	م. زينب ابراهيم	18
20-Design and Implementation of a Real-Time Quadcopter with Camera for Rescue Operations	م. سيف الدين عبد الامير	19
21-Design Soccer Ball to Generate Energy for Light	م. نادية قاسم محمد	20
22-Design and Implementation for a Smart Cradle	م.م. ثامر موسى	21
23-Design and Implementation of Microcontroller-Based Power Consumption and Controlling System		
24-Cryptography of Color Images	م. م. ايناس حامد ابراهيم	22
25-Cryptography of Gray Images		
26-Estimation and Reduction of Power System Losses	م.م. احمد محسن	23
27-Power Factor Correction Using Microcontroller	م.م. هدى منهي	24

28-Concepts of Inductor Design for Power Converters 29-Hybrid renewable energy systems	م.م. رائد فؤاد	25
30-Brushless DC Motor Controller Design Swarm Optimization Based	م.م. مهند عزيز جودي	26
31-Obstacle Avoidance Robotic Vehicle Using Ultrasonic Sensor for Obstacle Detection 32-Hand Motion Controlled Robotic Vehicle	م.م. فرح علي	27
33-The Design and Implementation of a Data Acquisition System (DAQ) Using Labview 34-The Design and Implementation of an Arduino-Based Vehicle Tracker	م.م. فاروق عبد الغفور	28
35-A Robot Controlled by Hand Gesture Using Arduino 36-Line following robot using Arduino	م.م. رواد لؤي	29
37-Dynamic State Estimation in Power Systems 38-Reactive Power Compensation in Electric Power system	م.م. أكرم نوري	30
39-Design and Simulation of DC to DC Boost Converter with PID Controller 40-Design and Simulation of DC to DC Cuk Converter with PI Controller	م.م. عمار فلاح	31
